1 [Process modeling in Web applications](#)

Marco Brambilla, Stefano Ceri, Piero Fraternali, Ioana Manolescu

 October 2006 **ACM Transactions on Software Engineering and Methodology (TOSEM)**, Volume 15 Issue 4

Publisher: ACM Press

 Full text available: [pdf\(1.17 MB\)](#)

 Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

While Web applications evolve towards ubiquitous, enterprise-wide or multienterprise information systems, they face new requirements, such as the capability of managing complex processes spanning multiple users and organizations, by interconnecting software provided by different organizations. Significant efforts are currently being invested in application integration, to support the composition of business processes of different companies, so as to create complex, multiparty business scenarios. ...

Keywords: Web applications, Web engineering, conceptual modeling, workflows

2 [Integration and interoperation: Using the AMACONT architecture for flexible adaptation of 3D web applications](#)

Raimund Dachzelt, Michael Hinz, Stefan Pietschmann

 April 2006 **Proceedings of the eleventh international conference on 3D web technology Web3D '06**

Publisher: ACM Press

 Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Providing personalized content and applications which also address heterogeneous capabilities of multiple device types becomes a significant challenge of today's Web development. By now most of the work in the field of adaptive hypermedia is devoted to Web content such as hypertext, images, video, and animation, but rarely to three-dimensional graphics. Research on the adaptation of 3D graphics is still in its infancy. The generic approach introduced in this paper combines the AMACONT adaptive h ...

3 [Posters: HPG: a tool for presentation generation in WIS](#)

Bas Rutten, Peter Barna, Flavius Frasinicar, Geert-Jan Houben, Richard Vdovjak

 May 2004 **Proceedings of the 13th international World Wide Web conference on Alternate track papers & posters**

Publisher: ACM Press

 Full text available: [pdf\(1.29 MB\)](#)

 Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Web Information Systems (WIS) support the process of retrieving information from sources on

the Web and of presenting them as a hypermedia presentation. Most WIS design methodologies focus on the engineering of the abstract navigation (hyperlinks). The actual presentation generation is less supported. Hera is one of the few WIS methodologies that offer a tool for presentation generation (HPG). The HPG transforms RDF data obtained as the result of a query into a Web presentation suited to the use ...

Keywords: RDF(S), WIS, XSLT, hypermedia, presentation generation

4 Design principles for data-intensive Web sites

 Stefano Ceri, Piero Fraternali, Stefano Paraboschi
March 1999 **ACM SIGMOD Record**, Volume 28 Issue 1

Publisher: ACM Press

Full text available:  [pdf\(716.61 KB\)](#) Additional Information: [full citation](#), [citations](#), [index terms](#)

5 Web technologies and applications (WTA): Design and implementation of component-based adaptive Web presentations

 Zoltán Fiala, Michael Hinz, Geert-Jan Houben, Flavius Frasinca
March 2004 **Proceedings of the 2004 ACM symposium on Applied computing**

Publisher: ACM Press

Full text available:  [pdf\(260.96 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#)

Engineering adaptive Web applications implies the development of content that can be automatically adjusted to varying client devices and user preferences. To meet this requirement, the AMACONT project recently introduced a component-based XML document format. Configurable document components encapsulating adaptive behavior and layout are used on different abstraction levels in order to support flexible reuse for effective Web page generation. This paper focuses on the process of designing and i ...

Keywords: adaptive hypermedia, component-based Web engineering, design methods

6 Experience reports: Web tool for health insurance design by small groups: usability study

 Laurie Kantner, Susan Dorr Gool, Marion Danis, Mike Nowak, Lesa Monroe-Gatrell
April 2006 **CHI '06 extended abstracts on Human factors in computing systems CHI '06**

Publisher: ACM Press

Full text available:  [pdf\(484.96 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

This Experience Report describes the challenges of evaluating the usability of a Web-based collaborative health insurance benefits planning application. The application was created by researchers at the National Institutes of Health and the University of Michigan.

Keywords: CSCW, collaborative applications, computer mediation, longitudinal studies, usability evaluation

7 CS265 web network and web site management development of a core course in the Internet technology minor curriculum

Kevin D. Hufford

April 2001 **Journal of Computing Sciences in Colleges , Proceedings of the sixth annual CCSC northeastern conference on The journal of computing in small colleges**, Volume 16 Issue 4

Publisher: Consortium for Computing Sciences in Colleges , Consortium for Computing Sciences in Colleges

Full text available:  [pdf\(91.28 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

The Internet is rapidly expanding into the world of commerce and communication media. The students in many different college majors, including CS and CIS, have an increasing desire to learn more about the Internet and what, where, when, why and how it is used. The question

that they have is "How can they get involved and learn about the Internet as it relates to their major field of interest. Our current college students are witnessing a phenomenal effort by organizations of all types (e.g., ...

8 Posters: Hera presentation generator

Flavius Frasinicar, Geert-Jan Houben, Peter Barna

May 2005 **Special interest tracks and posters of the 14th international conference on World Wide Web**

Publisher: ACM Press

Full text available: [pdf\(86.90 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Semantic Web Information Systems (SWIS) are Web Information Systems that use Semantic Web technologies. Hera is a model-driven design methodology for SWIS. In Hera, models are represented in RDFS and model instances in RDF. The Hera Presentation Generator (HPG) is an integrated development environment that supports the presentation generation layer of the Hera methodology. The HPG is based on a pipeline of data transformations driven by different Hera models.

Keywords: RDF(S), SWIS, WIS, design environment, semantic web

9 Languages & Authoring for the Semnatic Web: The Yin/Yang web: XML syntax and RDF semantics

Peter Patel-Schneider, Jérôme Siméon

May 2002 **Proceedings of the 11th international conference on World Wide Web**

Publisher: ACM Press

Full text available: [pdf\(162.67 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citing](#), [index terms](#)

XML is the W3C standard document format for *writing* and *exchanging* information on the Web. RDF is the W3C standard model for *describing the semantics* and *reasoning about* information on the Web. Unfortunately, RDF and XML---although very close to each other---are based on two different paradigms. We argue that in order to lead the Semantic Web to its full potential, the syntax and the semantics of information needs to work together. To this end, we develop a model-theo ...

Keywords: RDF, XML, data models, model theory, semantic web

10 Web accessibility: From assistive technology to a web accessibility service

Peter G. Fairweather, Vicki L. Hanson, Sam R. Detweiler, Richard S. Schwerdtfeger

July 2002 **Proceedings of the fifth international ACM conference on Assistive technologies**

Publisher: ACM Press

Full text available: [pdf\(460.49 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citing](#), [index terms](#)

This paper considers different ways to enhance access to the World Wide Web for persons with sensory, cognitive, or motor limitations. Paradoxically, while complex Web architectures may seem to have inhibited accessibility, they have broadened the range of points where we can try to improve it. This paper identifies these points and evaluates the advantages and disadvantages of each. In particular, it describes a project to develop a strategy to enhance access that can be distributed across mult ...

Keywords: Web services, World Wide Web, accessibility, adaptive interfaces
